5 THINGS TO DO FOR YOUR GARAGE DOOR

2 minutes a month = no surprise **\$400**
repair. 📍

→ FOLLOW @WELBORN_GARAGE

Look & Listen

✓ DO #1

Once a month, watch it open. **Grinding, popping or jerking** is your early warning — far cheaper to fix now than later.

Lube It Right

✓ DO #2

Hit the rollers, hinges & springs with **silicone** **or white-lithium** spray. Skip the **WD-40** — it's a degreaser, not a lubricant.

The Tracks

✓ DO #3

Wipe them clean with a rag — don't grease them. Grease catches dust and gums up the whole door.

Test The Balance

✓ DO #4

Pull the release and lift the door halfway. A healthy door **stays put** — if it drops, your springs need a pro.

Safety Reverse

✓ DO #5

Wave a broom under the closing door — it should **reverse instantly**. If it doesn't, stop using it and call us.
